CLUB PURPOSE

The Golden Hills Mustang Club, established in 1982, is a nonprofit organization, the purpose of which is to promote the admiration, ownership, care and maintenance of the Ford Mustang Automobile - regardless of model year.

The club provides a social group for its members whereby they can meet, socialize and maintain a spirit of good fellowship, and participate in activities including the use of their Mustang.

The club serves as a medium for the exchange of ideas, information and parts, and is dedicated to furthering the interest of owners and drivers of the Ford Mustang.

Moving Forward

By President Sue Calvert

WOW! Last month I asked for All Hands On Deck for our Biggest Little Car Show. While not all hands were able to show up, those members who did come out to help certainly brought their A+ Game!! I am so thankful to everyone who made our car show another rousing success. From Registration and Parking, all the way to

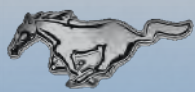

Clean-Up...you guys **ROCKED!** The raffles were so successful that we'll be able to make a wonderful donation to the two charities we supported this year. Please read Robin Paulsell's article in this newsletter issue.

The summer months are filling up with lots of events and I'm sure there is something for every member in our club. Please take a look at the calendar in this issue and make plans to attend. I'd love to see some new faces! Remember...this is **YOUR** club!

If you have an idea or suggestion for an event, please let Dan McCabe or me know about it. If it's something you like to do, chances are there are other people in the club who would enjoy it, too.

Please keep an eye out for email announcements, as well. We have some interesting things coming soon...

Wishing you a happy June!

38th Annual Biggest Little Car Show

On Saturday May 20th, 2023, over 120 Mustangs and a handful of other Fords once again descended on the Suisun City Downtown Waterfront for the 38th Annual Biggest Little Car Show. On the heels of the MCA National last year and by popular demand the MCA Judged Class returned to the show format after a 9-year absence with an increased 36 car limit that was quickly sold out. New for this year was the Day of Show Class where rather than integrating cars that did not pre-register into the regular Participant Choice classes, they were given their own class with awards. GHMC members Mustangs that were not entered in the MCA Judged Class had their own Participant Choice class in which they weren't allowed to vote in, this is done so we don't compete against our guests Mustangs.

Continuing the theme started at last year's National the waterfront was lined with Mustangs and the center half circle featured 5 GHMC members cars. Centered in the display was Kathy Loya's 1968 California Special featured on the show t-shirt and displayed in honor of the late Bob Loya. Flanking their car on the left was Ron Normandin's 68 California Special and Rob Lo's 67 Coupe, on the right were my 90 LX Hatchback and 89 GT Convertible.

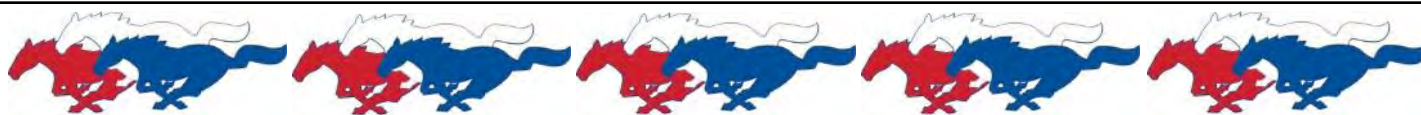

The day started bright and early with the first car showing up at 6:15 AM when Manuel Perez, a regular at our show arrived. After a quick setup by club members the cars began rolling through registration at 7:00 AM and were parked by chair George Pezzolo and his skilled staff. Show registrar Brenda Romero with a major assist from Paige Paulsell and Jim Willis kept a steady flow of cars moving right up to registration closing at 9:00 AM. Returning DJ Adams kept the tunes flowing and made announcements throughout the day. The Solano County Sheriff's Color Guard performed the opening ceremony at 10:00 AM and as always did an excellent job. I must admit it was strange not seeing recently retired lead deputy and GHMC member Dennis Von Ting not performing with them, Dennis was here helping wife Tisha at her vendor booth. Club President Sue Calvert and her staff kept the raffle prizes flowing throughout the day and brought in over \$1200 for our two charities The Gavin Buchanan Memorial Foundation and VEST.

Danny and Cristy Cordeiro collected \$450 in the 50/50 raffle which after the split will net another \$225 to our charities. After a brief judges meeting our team of crack judges lead by myself started judging the MCA Class cars at 11:00 and completed ahead of schedule at 12:15. Thanks to Paige Paulsell, Joel Edelmann, George Pezzolo, and guest judge Butch Eckhoff, who along with myself lead judging teams. Thanks also to judges Rob Lo, Paul Troxell, Bob Fentress, and Ron Freitas for taking the time to help. We are fortunate to have the use of this wonderful show site free of charge from the City of Suisun City and I was honored to meet Mayor Alma Hernandez at the show. I also want to thank Justeen Singley and the staff at Suisun Parks and Recreation. I tasked the Mayor with picking her favorite car for our Mayor's Pick award. Thank you Pat Brandon for escorting her around and explaining the difference in all the cars to her, she was super excited when turning in her ballot to Brenda.

In no time at all we were ready for the awards. 33 Award of Excellence trophies were handed out in the Participant Choice Class. 29 Gold, 2 Silver, and 1 Bronze Awards were handed out in the MCA Class followed by 5 special awards. The Central Valley Mustang Club with 9 cars received the Club Participation Award, Sam Medina with his 69 Mustang Fastback received the CHP Pick Award, Phill Ramirez with his 65 Mustang Convertible received the Mayor's Pick Award, Shelle McGee-Lucas with her 68 Mercury Cougar received the GHMC President's Pick Award, and I was fortunate to receive the Best of Show Award for Project 89 my 1989 Mustang GT Convertible. The "Friendliest Little Club" put on one heck of a show and all of you should be very proud! This club has had my back since 2009 and I want to personally thank everyone that helped throughout the past 1 year.

Will C. Wood 2023

By Dan McCabe

The first Friday in May is Vacaville's Will C. Wood's High School student's car show. This lunch time event has been going on for many years and the Golden Hills Mustang Club has participated in most of them. The students take an active part in putting on this show and we are happy to say it draws a lot of local car owners as well as some of the student's own cars. This is a great way to see our future generation, share our passion, and answer questions about our Mustangs.

Thank You Terry Burke, Paul & Alice Troxell, Rob Lo, Ron Normandin, and Jeff Walton for taking the time out of your day to support this event.

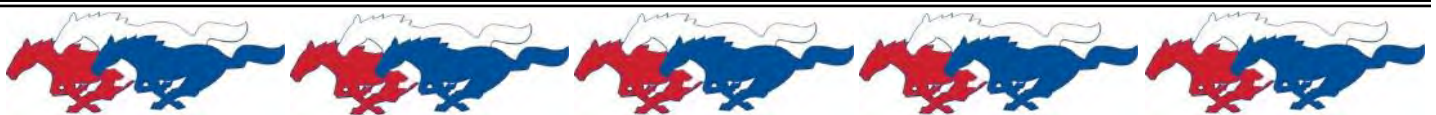

RODRIGUEZ HIGH SCHOOL CAR SHOW

Rodriguez High School in Cordelia was the place to be for another great high school student car show. This was their 1st annual show, held on Saturday, May 13th. This was another event put on by the students and it was a great success! A wide variety of classic and newer cars and trucks were on display and we were pleased to see some old friends. Paul & Kathy Thoren were there to support their Granddaughter who helped put this show on. Also, for the first time, Nicole vonTing displayed "her" bright yellow Mustang GT Convertible and matching pedal car.

Gene Tapia brought his "other ride", a beautiful red, highly modified, 1969 SS396 Chevelle.

This was fun day and I know Rob Lo was happy to be awarded a nice skate board trophy for his '67 Mustang! Thank You to Sue Calvert, Nicole, Rob, & Gene Tapia for supporting this show. Thank You, Rob Lo for helping me take pictures for the website.

By Dan McCabe

Wings-N-Wheels Car Show

Travis AFB Aviation Museum

by Brian Evans

Sunday, May 21 was the second annual Wings-N-Wheels car show, held as a fundraiser for the Aviation Museum out at Travis Air Force Base. They did not charge a registration fee to display a classic, vintage, or modern car, truck or motorcycle, but rather depended on voluntary donations in their large clear container inside the museum. They should've charged a registration fee, as I saw way too many single dollar bills filling up the container. I know gas is expensive, but c'mon people...!

I want to thank Terry Burke, who retired from Travis, who first brought this show to the club's attention at our April Board Meeting. It immediately piqued my interest, because as some of you know, I come from an Air Force family. Not only that, but that very day of the Board Meeting, April 6, I had been out to the Aviation Museum that morning to see and spend some time with a very special aircraft...the C-124, aka "Old Shakey", a four engine, propeller driven cargo transport plane that my dad flew in his first ten years as a young Air Force Pilot from 1954 to 1964. It was phased out or replaced by the C-141 jet in 1964 as the Air Forces' primary cargo transport aircraft. This plane was the very last C-124 to fly, arriving at Travis in June 1984, and of course, my dad was there that day. A friend who participates in the civilian Honorary Commander program had made arrangements with her assigned Travis leadership to have the plane "un-sealed", so I could actually go inside and, fighting my way through some cobwebs, sit in the pilot seat. Does it get any better than this? It does...the C-124 at Travis, serial #52-1000, was assigned to Dover AFB, Delaware throughout the

1950's, where my dad was stationed, so he flew that very plane many, many times all over the world. Needless to say, sitting in the left pilot seat, where he had sat many times, generated some of those things that flow from our eyes (rhymes with "gears").

Back to the car show. There was a nice variety of about 50 classic cars, trucks and even a few motorcycles parked all around the vintage aircraft on permanent display at the museum. Because I met the Museum Director, Kevin Sullivan, back in April, I had requested to park under the wing or near the fuselage of the C-124. When I arrived at the show, there was a long line of cars waiting to be directed to park. When I finally saw Kevin and waved, he came over and said, "pull your car out of line and follow me", giving me the parking spot I wanted next to the 124!

Wings-N-Wheels Car Show

Travis AFB Aviation Museum

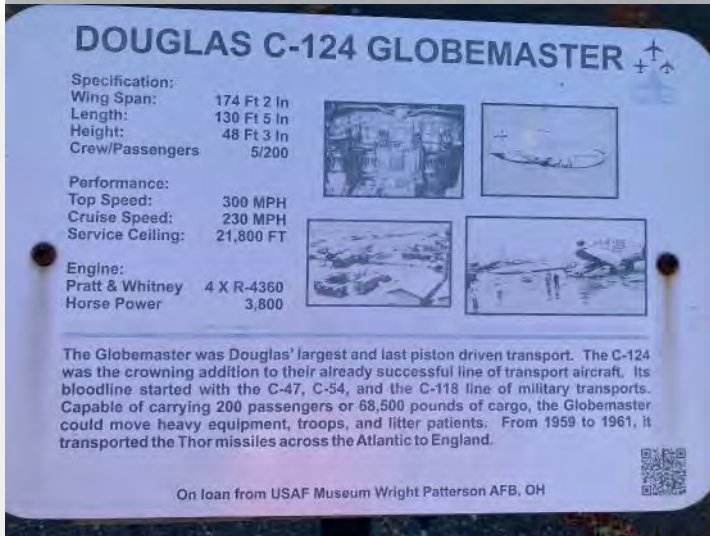

As usual for a car show, the best part was meeting new folks and talking about our current cars, our past cars (I should'a never sold that...) and just our appreciation for cars in general.

One final reason I liked this show was there was no participant or spectator voting for this show, which means you can just enjoy the cars and the people you meet, friends old and new, with no deadline to turn in a ballot

that's due in 15 minutes and you haven't even started on it yet. We all know that "spectator voting" just turns into a ballot stuffing exercise for those hell-bent on winning a trophy, ask anyone who's attended the Benicia or Budweiser car shows, among others, in the last ten years!

Let's get more cars out next year, it was a fun show and a great success!

by Brian Evans

Vacaville Fiesta Days Parade

by Brian Evans

To the best of my knowledge, one of the oldest parades in our area takes place as part of Vacaville's annual Fiesta Days celebration every Memorial Day weekend. This celebration of Vacaville's town history, heritage and pride has been held since 1957 in downtown Vacaville. I *Imagine* (John Lennon 1971) the first 1957 Fiesta Days parade had some shiny, brand new Ford Thunderbirds with their state-of-the-art design porthole windows and perhaps some sleek *Little Red Corvettes* (Prince 1982). Otherwise, the "old cars" in a 1957 parade were probably 1920's and 30's Model A's and T's that were built *One Piece at a Time* (Johnny Cash 1976).

There were probably also Sedans, Roadsters and *Hot Rod* *Lincolns* (Commander Cody 1971) that actually had Ford or other original engines! Some of the local old-timers I checked with recall seeing a maroon 1939 Mercury 8 Town Sedan with a "for sale" sign on it at one of the early parades...*Dream On!* (Aerosmith 1973). So, this Fiesta Days event and parade is still going strong 65 years later, and year after year continues to draw large crowds to the Saturday morning parade, cheering on the many parade entrants.

This year was no exception. A cool, cloudy unseasonal 75-degree day was forecasted, which is perfect parade weather! No spewing-over radiators or vapor-locking carburetors on the older classics! We started the day at our usual meeting spot at the downtown Bank of America parking lot and then once all had arrived, we caravanned over to our usual assigned staging area in the Golden

Hills Mustang M.S.A. ("*Mustang Sally* (Wilson Pickett 1966) Alley").

This year we had 11 cars sign up, and three of us with convertibles, Dan McCabe with his 1998 Saleen S281, Neal Randles with his 1965 convertible, and myself with my '68 agreed to a late request to help transport some of the Fiesta Queens through the parade. Fortunately, the Fiesta Queens are usually one of the earlier entries in the parade, so we had time to circle back for "double duty", driving a second time through the parade!

The Golden Hills Mustang Club cars were decorated in our usual patriotic theme, and with only 11 cars, we decided to drive single file on the parade route, following Donnie McEachern's 1965 F-150 truck displaying our club banner.

Vacaville Fiesta Days Parade cont.

by Brian Evans

Finally, as some of us were starting to get hungry, it was time for us to enjoy our time in the *Lime-light* (Rush 1981) parading down Merchant Street enjoying the smiles, waves, and thumbs up from the many spectators.

After the parade, most of us went out for lunch at Fenton's Ice Cream Creamery, where we have enjoyed lunch in prior years. It was an enjoyable time conversing with friends and sharing pictures taken at the parade.

I'd like to thank club members Sue Calvert, Dan & Cristy Cordeiro, Bill Davis, Jack & Eryn Judd, Dan McCabe, Pete and Lisa

Mitsopoulos, Donnie McEachern, Ron & Liz Normandin. Neal Randles, and Paul & Alice Troxell for joining me and making a great showing at this parade, supporting our community, and celebrating Vacaville's heritage!

Tech Talk 2.0

Torque Those Wheels!

Here it is June already! We have all been out enjoying a drive or a cruise and stretching the legs on our Ponies. So, I am absolutely sure that we all have done the “Once Over” to make sure that they are ready for the road. Right? Did you check your wheels for tightness? OK, so I am going to just assume that you have not. They did that at the tire shop when they installed the new tires a few years back, right? Oh no, it was when I had them rotated! Oh, that was a couple of years ago, too!

No matter if you have factory steel or alloy wheels, or if you have the mega dollar aftermarket set that are made of exotic metals extracted from asteroids that impact the earth only in the month of June, **YOU NEED TO PROPERLY TORQUE YOUR WHEELS.** Here I will provide a short primer on how to do this yourself, or be reasonably sure that the shop that you use is following an acceptable procedure to ensure that your wheels are installed on your car properly.

If your wheels are already on your car, you can simply use your own torque wrench set to the torque specified in your Owner’s Manual (can be found online if you do not have one). Simply check each lug nut in a star pattern (move from one lug nut to the next on the opposite side of the wheel) to ensure that it is at the specified torque. If you do not have a torque wrench, or feel that you can’t accomplish this on your own, stop by your tire shop and ask them to do this for you. Any reputable shop will be happy to provide this service at no charge. Now you can be reasonably sure that none of your wheels are going to make a right while you are making a left. Also, keep in mind that you are responsible for any damage that results from your wheels leaving your vehicle just like the stuff in the back of your pickup that you decided not to tie down because “I’ll be careful” always worked before.

Now, if you are more like me and remove your wheels to clean the barrels and put tire shine on the insides of the tires there is a bit more to it. I will save you the procedure for jacking the vehicle, checking wheel bearings, inspecting the tires for damage and wear, cleaning and detailing, and just get to how to reinstall them properly. **FIRST**, you want to make sure that the lug bores and the wheel face that goes onto the hubs is clean and in good condition, as well as the hub face. A wire brush and some Brake Clean will make short work of this job. Don’t forget to clean the wheel studs. Clean and dry is correct here. **DO NOT** use oil, never seize, or grease on these as it will seriously affect the torque values that you will see on your wrench and cause you to grossly overtighten, or even break the studs. If the lug nuts are too tight, they can cause severe

problems such as stripping of the threads or stretching of the studs. It can also cause warping of the drums, rotors, or hubs. Now place the wheels on the studs and **BY HAND** thread lug nuts onto each stud and hand tighten all of them. This will require wiggling the wheel and tire while tightening the lug nuts **BY HAND**. This will seat the wheel onto the hub in the properly and ensure that you have not cross threaded any of the lug nuts. Once you have done this it is time to set your torque wrench to one half of the specified torque for your car; (my ’17 GT’s value is 150-foot pounds so I start at 75-foot pounds), and tighten each lug nut in a star pattern to 75-foot pounds. Easily done on the rears with the emergency brake set. Have a friend, or your significant other hold the foot brake to do the front wheels. After setting all nuts at ½ your target torque value you can go straight to the specified torque. **BUT** you are not done, yet. I still recommend going over all of the lug nuts one more time to ensure that the specified torque for each and every one is set properly. Now you have properly torqued your wheels! As added insurance, I prefer to recheck my torque after I have driven the car for 5-10 miles. I have found, on occasion, that this short drive will re seat the wheel and actual torque values can be very slightly lower.

One last item, buy a good quality torque wrench. I know, I know, HF has them for \$29.95 or “I can get the Wonder Wrench on Amazon for \$39.95”. Trust me, you will be wondering why you wasted your money on one of them. Those are junk and I would not tighten the screws on the drawers of my workbench with them. They are neither accurate or consistent and they will cost you much more in stripped threads, pulled studs, and broken bolts than you can imagine. A decent wrench can be had for \$3-400.00. If you want some thing that you can be sure of it is going to cost you \$7-800.00. If you have some extra time and want to throw your tire shop into fits ask them “When was the last time that you had your torque wrenches calibrated?” Yes, there is such a thing as calibrating these tools. I will save that for another time.

Pedal to the Metal!

A BLAST FROM THE PAST

It's Camping Trip Time! Here is fun memory of a past GHMC Camping Trip.
Can anyone guess the date?

CONGRATULATIONS

In case you are trying to figure out the date that picture was taken, it was 10 years ago! Yes, June 2013, and the two sets of twins in the front row are graduating high school this year.

- ★ Congratulations to **Charlette & Mackenzie Burke** who graduated on May 29, 2023 in Kodiak, Alaska.
- ★ Congratulations also go to **Danielle and Nicole vonTing** who are graduating June 9, 2023 from Buckingham Charter Academy in Vacaville.
- ★ Congratulations to **Joey Holecek** who got his Bachelor's Degree in Criminal Justice with honors from Sacramento State on May 20, 2023.
